## PROFESSIONAL EXPERIENCE

**Frontend Developer** – FSDH Merchant Bank | Lagos, Nigeria **Apr. 2022 - Present**

- Eliminated redundancies in business operations by 12% by automating 30% of the bank's existing processes and designing and implementing new processes in collaboration with product managers, and backend and frontend developers.
- Built web applications and portals for internal use that directly translated into better company-wide performance by reviewing business requirements documents and developing designs according to business specifications.
- Designed and built an API dashboard that improved the transactions overview for hundreds of clients while documenting 3 external APIs; FSDH 360, FSDH Pay, and FSDH BVN API.
- Leveraged responsive web frameworks to consistently complete in-house project deliverables of converting Figma and XD designs into HTML, CSS, and JSX ahead of schedule.
- Improved outcomes for end users by deploying REST APIs to enhance seamless information exchange with third parties.
- Executed and contributed to full-stack web development projects, focusing on frontend features, browser manipulation, and cross-browser compatibility.
- Completed the following projects that involved designing with Figma and working with backend developers to implement;
  - Nigerian Export Supervision Scheme Fee (NESS)
  - Letters of Credit (LC portal)
  - Telex Email Interface
  - Customer Risk Rating platform

Tab Tech Software Solutions

**Frontend Developer** **Jun. 2020 – Apr. 2022**

- Identified new needs and requirements and participated in designing products with multiple developers to implement different solutions for organizations.
- Optimized the product order management for 1med Solutions through frontend redesign and API integration for the admin dashboard.
- Designed the Seven Up Bottling Company collections branch assist interface and the Prestige Portal.
- Automated the task tracker for other employees using React JS and managed frontend designs that provided solutions to internal efficiency.
- Converted 247electric from Figma to HTML, CSS, and JavaScript and developed the 247electric admin interface using React JS, HTML, and CSS.
- Worked with the Solutions Architect in mentoring other Junior Developers in Frontend Development.

**Software Tester**

**Jun. 2020 – Apr. 2022**

- Analyzed the business requirement for mobile and web applications, created test strategies, and generated the test planes.

- Worked with a team of product managers, software testers, and backend and frontend developers to test manually.
- Performed manual testing and API testing, and regression testing on mobile and web applications.
- Executed test cases to test application functionality against the requirement manually.
- Interacted with developers and users to communicate defects actively while understanding software requirements and specifications and identifying test scenarios.
- Reported bugs using Jira and utilized resources to meet mobile and web application specifications by analyzing expected input/output results.
